

November 16, 2006

This is the second e-newsletter in the series of newsletters regarding the proposed transportation improvements on Russell Street and South 3rd Street in Missoula.

Over the last two weeks HKM has continued to review previous analyses, working drawings, and environmental documentation for the proposed improvements on Russell and South 3rd. We have identified some information gaps that we are attempting to fill over the next few weeks. HKM does not anticipate any major delays due to the current unavailability of this information, but will keep the public apprised of any substantial impact on our intended schedule.

Based on our review of the previous documents and public comments received to date, HKM has provided new graphic depictions of the alternatives in an attempt to clarify elements and operational characteristics of each alternative developed to date. These graphics will be available on the website in the next week.

During the last week, HKM began coordinating with the West Broadway Design Team to make sure the proposed improvements on Russell and Broadway are consistent between the two planning efforts.

HKM is also coordinating with one neighborhood council to provide a presentation on the proposed improvements, and is open to working with other neighborhood or civic groups to gather input and inform the community on our progress. Please contact us if you are interested in a presentation for your group.

Please let me know if you know anyone who would like to be added to this list.

Thank you for your interest and involvement in the project!

Jennifer
