

DOWL HKM staff is organized into major work groups including Structural, Transportation, Municipal/Utilities, Water Resources, Geotechnical, Geoenvironmental, Construction Administration, and Materials Testing.

Through active engagement of an interdisciplinary team of dedicated professionals, DOWL HKM seeks to exceed client expectations with every project. We respect the needs of each client and their individual project needs, and continually aspire to become trusted advisors and partners in the delivery of their plans, programs, and projects.

Our work history and current client base consists of over 100 water user and irrigation districts; hundreds of school districts, cities, and counties of all sizes; dozens of state and federal agencies; and over 30 Tribal governments.
