

Our materials laboratory works in concert with our related discipline areas to support all DOWL HKM projects. Appropriately accredited, our materials laboratory follows industry-recognized protocols, producing legally defensible results. Our scientists and technicians work side by side with DOWL HKM project teams, developing sampling programs, writing test specifications, and interpreting test results.

MATERIALS TESTING

SERVICES PROVIDED:

Soils, Rock, Aggregate Testing

Construction Materials Testing

Product Testing

Mechanical Testing

Concrete Mix Design

Asphalt Mix Design
