

Water and wastewater infrastructure is the invisible backbone of our communities, providing safe drinking water and sufficient sanitation facilities critical to public safety and economic prosperity. DOWL HKM staff provide the expertise to manage the full range of the water industry challenges from water rights development to wastewater discharge permitting. Services include master planning, funding acquisition assistance, permitting, and final design for the full spectrum of water and wastewater infrastructure. Completed projects range from minor water and sewer main rehabilitation to state-of-the-art water and wastewater treatment facilities and surface water intakes. Related support services include construction administration, operator training, and utility rate studies.

MUNICIPAL UTILITIES

SERVICES PROVIDED:

Master Plans/Facility Plans

Raw Water Intakes

Groundwater Development

Treated Water Storage

Water Distribution Systems

Water Treatment

Wastewater Treatment & Reuse

Membrane Filtration Process

Plant Operator Training

Pipeline Routing/Permitting

Storm water Management

Drainage Systems

Separation of Combined Sewers

Well Design

Pipe Corrosion Studies

Rate Studies

Grant Applications

NPDES Discharge Permits

NEPA/MEPA Compliance Document
